What does it measure?

Welcome to the Metric Tracking System (MTS). MTS is a performance measurement system that captures key financial management indicators across the Federal Government. The tool's intent is to provide government managers, Congress, and other stakeholders information to assess the financial management health of the Federal Government as a whole and for each individual agency. Tracking performance on indicators helps to guide financial management reforms and targets resources to areas where better stewardship is needed.

How are we doing?

The CFO Council will use this space to summarize trends in the financial indicators. The summary will include progress, trends, and corrective actions (when applicable).

1. Fund Balance with Treasury (Net)

What does it measure?

Identifies the difference between the fund balance reported in Treasury reports and the agency fund balance with Treasury recorded in its general ledger on a net basis.

Why is it important?

Smaller reconciliation differences translate to greater integrity of financial reports and budget results.

Goals

Green – fully successful <= 2%

Yellow – minimally successful > 2% - <= 10%

Red – unsuccessful > 10%

2. Amount in Suspense (Absolute) Greater than 60 Days Old

The timeliness of clearing and reconciling suspense accounts. This metric is reported quarterly. Only the 3875 Suspense Account is measured. The 3880 and 3885 measures are shown for contextual information only.

Prompt clearance of amounts in suspense translates to greater integrity of balances. Timely reconciliation supports clean audits and makes financial information more accurate.

3. Delinquent Accounts Receivable from Public Over 180 days

What does it measure?

The success in reducing or eliminating delinquent accounts receivable from the public. This metric is reported quarterly.

Why is it important?

It shows how well the agency actively collects debt. Actively collecting debt improves management accountability, reduces Treasury borrowing, and increases accuracy in reporting.

Goals

4. Electronic Payments

What does it measure?

The number of electronic payments measures the extent to which vendors are paid electronically.

Why is it important?

A high use of electronic funds transfer saves money, reduces paperwork, and improves cash management.

Goals

Green – fully successful $\geq 96\%$

Yellow – minimally successful $\geq 90\% - < 96\%$

Red – unsuccessful $< 90\%$

5a. Percent Invoices Paid on Time

What does it measure?

How many invoices are paid on time in accordance with the Prompt Payment Act (PPA). The percentage of the dollar value of those invoices paid on time is also displayed, for contextual information.

[\(Explanation of 6/2007 Changes\)](#)

Why is it important?

Timely payment reduces interest charges and reflects a high degree of accountability and integrity.

Goals

Green – fully successful $\geq 98\%$

Yellow – minimally successful $\geq 97\% - < 98\%$

Red – unsuccessful $< 97\%$

5b. Interest Penalties Paid

What does it measure?

The effect of late payments in the amount of interest penalties paid relative to the total dollars of invoices paid. The metric amount represents dollars of interest paid per \$1million in total payments.

[\(Explanation of 6/2007 Changes\)](#)

Why is it important?

Smaller amounts of interest paid shows that an agency is paying its bills in a timely manner in accordance with the Prompt Payment Act. Not having to pay interest saves agencies money and allows funds to be used for their intended purpose.

MTS Financial Management Indicators

How are we doing?

Federal agencies are owed debts from a variety of individuals and entities. A few examples of debt are loan repayments, duplicate or erroneous grant or entitlement payments, as well as fines or penalties and other debts. These debts total billions of dollars government-wide. Improving the management of these debts – especially improved performance in the collection of outstanding debts – is important to ensuring that taxpayer dollars are spent wisely and efficiently.

Indicator 3, Delinquent Accounts Receivable from the Public, of the Metric Tracking System (MTS) reports on public debt that has been delinquent for more than 180 days. According to the metric goals, agencies have a way to go to meet the Green standard. What the data doesn't show, however, is why some agencies are reporting more delinquent debt than others. For example, some agencies: (1) have a high percentage of debt in litigation; (2) are attempting to collect from bankrupt debtors; or (3) are collecting debt at guaranteed lenders. Each of these efforts often takes considerable time to resolve.

Agencies are diligently working to reduce the amount of delinquent debt in this category by improving the screening of potential borrowers and improving internal agency collection practices. In the case of credit programs, improvements are also being made in litigating the debt at the Department of Justice, and transferring the debt to the Department of the Treasury for cross-servicing and administrative offset opportunities.
